

1. K-love radio heard on 91.5 FM in Seymour, Indiana is commercial free, provides useful news updates, is positive and encouraging, and I do not need to worry about content broadcast on the station that my children will hear. My family and I enjoy the music and my children sing along. I like knowing that I can listen to K-LOVE when I travel throughout the country.
2. If K-LOVE were displaced by an LPFM, an empty place would be left where Christian music and encouragment was once given. People who can call the station for counseling and help would be left without a necessary service.
3. K-LOVE is obviously in the public interest because it is listener supported. The public keeps it on the air. During the pledge drives, everyone always comes together to ensure that K-LOVE is funded. I financially support K-LOVE and I recommend the station to everyone I know. The contemporary music sounds like pop, but the lyrics are wholesome. It provides a great alternative to much of the rebellious music and sexually oriented programming provided by other stations.
